

**TURNING POINT**  
Counseling and Advocacy Center  
A place to heal from childhood sexual abuse

We hope this message finds you and your family doing well!

As many of you may already know, York County, along with the rest of the country, has been experiencing an increase in positive COVID-19 cases. Please be advised, Turning Point has decided in accordance with best practices, to transition back to telehealth beginning Monday November 23, 2020 for 2 weeks. We plan to reassess Friday December 4, 2020 and we will continue to update you as we learn new information.

This decision comes following research on best practices as recommended by state & federal officials. “Social Distancing” is a way to protect the health of Turning Point’s clients and staff, while continuing our vital services.

As we did in the Spring, we will continue providing services to clients remotely. Specifically, we will be using a HIPPA compliant video conferencing service called, Doxy. At this time, we have attempted to contact all current clients to discuss specific plans for connection over the next 2 weeks. If you have not received a phone call, please call in during normal business hours to touch base with our clinical staff.

Turning Point is lucky to have remote access to our phone and computer systems during this physical closure, so please do not hesitate to reach out to us at 717-755-8876. As always, in case of an emergency, please call 911 or the York County Crisis Team at 717-851-5320.

At Turning Point, we are mindful that change can be difficult and want to assure you of our unwavering commitment to continue to provide a safe and welcoming “virtual” environment for all survivors on their healing journey from childhood sexual abuse.
